Deployment Research Outline:

Vercel → has a feature that allows us developers to upload a front-end application for free directly from our GitHub repository

Render → has a feature that allows us to run a back-end server for free as well i

Deployment Strategy

Core Tech Stack:

Frontend UI: HTML5, CSS3, JavaScript (Fetch API) — *Deployed on Vercel*

Backend API: Python 3.10+, FastAPI / Flask, Scikit-Learn — *Deployed on Render*

Model Storage: Serialized .pkl / .joblib model binaries
